What's new:

Review GameKings is back with their latest hit: Bouncing Odyssey. Their previous game - No More Heroes 2 - gave gamers another round with Travis Touchdown; the game play was simple and one could have fun and compete with friends. With Bouncing Odyssey, GameKings crafted another fun and fast-paced game - the gameplay is more involved and engaging, and the levels are tailored to provide enough stress to pull in gamers at once. GameKings will be encouraging its players to stay away from the game's UI and tray to manage the levels, levels, and "Bouncing" as they bounce from one landscape to another; all the while clearing out the confetti which represents the other players' Bouncing levels they are competing in. Concept Bouncing Odyssey does not follow the same concept as No More Heroes 2: the game play takes on a leap forward; a leptopad is now in play, and it uses a reference meter which shows how many Bounces the player has left before they hit a Bouncing screen. GameKings created the game to increase the level of interaction with the UI - the screen is split into the different parts like you are able to see in Angry Birds or another popular game to name a few. Navigating the screen is a bit more difficult, as you must hop around while referencing the different elements. The Bouncing levels take up space on the leptopad, and you are able to create your own Bouncing levels when you reach a certain amount of points; if you are on a tight budget, you may want to find the free levels available online (such as ours), though after a certain amount of points, you will be able to create your own even better Bouncing levels. The creators of the game wanted to make levels that were never-ending, so you will always have something to do. GameKings had four types of modes to better elevate their game as an entertainment experience. One reason why the game is fun is because of the goals you must accomplish in different modes. The game has three modes; Classic, Solo, and Adventure. Classic Classic Classic mode has the newest m
